Also, see that it is on the label and stamp, and take no other.

The county should keep safe bridges on its main roads. The road which passes through this place, and which crosses Elkhorn a short distance below here, is such a road, and, at the above named creek, is without such a bridge. Therefore the county should build one. It is the duty of all governments, whether county, State or national, to advance the financial interests of their subjects. It is to the financial interests of these people to be enabled to reach the landing on the river at the mouth of Elkhorn. Therefore the county should favor and aid a move in that direction. Here we have the duty of the county in reference to two things, which fortunately for all concerned, are consolidated into one. That one thing is a new bridge in a new place, and that new place is a short distance below the present dilapidated bridge. Two birds killed at one throw is good throwing. NIPPER.
